A lot of interest had been created in the Journal locally and internationally.

African Journal of Health Sciences

Background: The sexual and reproductive health of African American women has been compromised due to multiple experiences of racism, including discriminatory healthcare practices from slavery through the post-Civil Rights era. However, studies rarely consider how the historical underpinnings of racism negatively influence the present-day health outcomes of African American women.

Racism, African American Women, and Their Sexual and ...

Reproductive health, or sexual health, denotes the health of an individual's reproductive system during all life stages.. The term can also be further defined more broadly within the framework of the World Health Organization's (WHO) definition of health—as “a state of complete physical, mental and social well-being, and not merely the absence of disease or infirmity”— to denote sexual ...

Reproductive health - Wikipedia

CDC's Division of Reproductive Health is the focal point for issues related to reproductive health, maternal health, and infant health. For over 50 years, we have been dedicated to improving the lives of women, children, and families through research, public health monitoring, scientific assistance, and partnerships.

Reproductive Health | CDC

Reproductive health refers to the condition of male and female reproductive systems during all life stages. These systems are made of organs and hormone-producing glands, including the pituitary gland in the brain. Ovaries in females and testicles in males are reproductive organs, or gonads, that maintain health of their respective systems.

Indeed, as noted in this statement, "sexual and reproductive health care equity cannot exist without racial and social justice." Accordingly, we issue a call for submissions to JPAG, as original studies, brief reports or commentaries that highlight the health impacts of social injustice and racism.

Ambient air pollution is projected to become a major environmental risk in sub-Saharan Africa (SSA). Research into its health impacts is hindered by limited data. We aimed to investigate the cross-sectional relationship between particulate matter with a diameter \leq 2.5 μ m (PM2.5) and prevalence of cough or acute lower respiratory infection (ALRI) among children under five in SSA. Data were ...
