Abstract. Applied Crime Analysis refers to the process of identifying, collating, interpreting, and reporting the results of the ideographic study of a particular case to provide a holistic understanding of the crime or crime series. This process differs from criminal profiling that is a more narrowly defined and applied inferential process. Although there are many types of crime analysis ...

Applied Crime Analysis | ScienceDirect

However, crime analysis is a broad term and there are many different types of crime analysis practiced by many professionals. Social scientists have a lot to offer in this regard too through the use of tools such as Applied Crime Analysis (ACA) and Criminal Profiling, with the latter being one type of crime analysis.
