Videotelephony, sometimes also referred to as video teleconference, comprises the technologies for the reception and transmission of audio-video signals by users in different locations, for communication between people in real time. A videophone is a telephone with a video display, capable of simultaneous video and audio for communication between people in real time.

Videotelephony - Wikipedia

A computer network is a group of computers that use a set of common communication protocols over digital interconnections for the purpose of sharing resources located on or provided by the network nodes. The interconnections between nodes are formed from a broad spectrum of telecommunication network technologies, based on physically wired, optical, and wireless radio-frequency methods that may ...
