Biology, Ecology and Culture of Grey Mulletts (Mugilidae) ...

Mulletts (grey mulletts) are a family (Mugilidae) and order of ray-finned fish found in temperate and tropical waters worldwide. There are approximately 80 species of mullet; these fish have been considered an important food source in Mediterranean Europe since Roman times. This book provides a long overdue update on the biology and ecology of mullet

Biology and Culture of Portunid Crabs of World Seas ...

An aspect of biology which deals with the inter-relationship between biotic and a biotic component as well as the relationships among the individuals of the biotic component is called ecology. Organisms form interacting systems or communities, these communities are coupled to their environments by transfer of matter and energy and so the communities and environment are interrelated.
