Approximately 79% of the world's population has brown eyes, which makes it the most common eye color in the world. After brown, 8%-10% of the world has blue eyes, 5% has amber or hazel eyes, and 2% of the world has green eyes. Rarer colored eyes include gray and red/violet. What is the World's Most Common Eye Color?

The World's Population By Eye Color Percentages - WorldAtlas

An international group of clinical geneticists, dysmorphologists, and other medical specialist have come together to create an atlas of human malformation syndromes in diverse populations. The purpose of this website is to provide a tool that is easy to use and helpful for the clinician in diagnosing syndromic disorders across varied populations.

Atlas of Human Malformation Syndromes in Diverse Populations

cell carcinoma is the most common cancer. On the face, it usually starts as a reddened papule or nodule with a smooth surface and a translucent, pearly quality. Because of a poorly formed stroma, it is fragile and often bleeds. On the torso, the lesion has an irregular surface, bright red color, sometimes scaly, with a distinct edge.
