Answer: Gasoline derives from fossil fuels. Alternative energy sources include liquid petroleum gas (LPG), biodiesel, pure plant oils, ethanol and hydrogen fuel cells. Question: Which of these is not a renewable energy source? Answer: Renewable energy sources, unlike fossil fuels, cannot be exhausted. Examples include solar, wind, hydroelectric ...

Energy and Thermodynamics Quiz | Britannica

The answer is simple: Under Clinton's climate plan, fossil fuel production would have been lower. Coal use would likely have fallen even faster, and renewable energy would have grown more quickly. Because of the increase in renewables, the upward trend for natural gas would have slackened as its U.S. market grew less quickly.
