I had written "Supercharge Excel" using Excel 2016, and it is the second edition of my other book "Learn to Write DAX" which I had written using Excel 2013. "Supercharge Power BI" can be considered as a sister book with the same contents but using Power BI Desktop interface.

### Getting Started with DAX Studio - Excelerator BI

My blog post "Power BI Free vs Pro and Premium", detailing the differences between the Power BI licences is extremely popular. It seems many people want to know how the licensing works. In truth it's fairly simple. Free gives you most facilities, but not sharing, Pro allows sharing with other Pro users and gives the main facilities most users need, and Premium is for large organisations ...

Level: Beginners. All of the learning examples in my books Supercharge Power BI and Supercharge Excel are built on an Adventure Works database that has a single data table. But Power Pivot is a very capable tool for building reports that combine multiple data tables.. Although it is very capable, the logic of how to combine multiple tables is different in Power Pivot than most Excel users will ...

### Multiple Data Tables in Power Pivot - Excelerator BI

However while researching this I came across the DAX Unichar() function, which returns the unicode character associated with an integer value - and which also seems to be completely undocumented for some reason. I guess because it's new (it isn't in Excel 2016 DAX yet as far as I can see).

### Chris Webb's BI Blog: The DAX Unichar() Function And How ...

Excel 2013=DATEDIF([DATE], [DATE], "Y")=DATEDIF(A2,B2,"Y")

### Power Pivot=DATEDIF([DATE], [DATE], "Y")

It's surprisingly easy to stop query folding happening in Power Query by changing the data type of a column. This is mentioned in the docs here, and it's something several people have blogged about already (for example here).However there is something new to note: an option that will allow you to convert text columns to number or date columns in a foldable way for SQL Server data sources.

Une des frustrations souvent évoquées par les utilisateurs d'Excel est l'impossibilité de travailler à plusieurs dans un même fichier. En fait, peu d'utilisateurs le savent, mais il existe une option pour permettre le travail collaboratif. Dans la version Excel 2013, vous pouvez également sauvegarder vos fichiers directement sur OneDrive (dans le cloud) pour permettre un meilleur partage ...

### Oui, vous pouvez travailler plusieurs en même temps dans ...

Excel 2013 offre de nombreuses possibilités pour construire des bases de données plus aisément. L'une d'entre elles est le Add-in Power Query, qui permet notamment d'importer, de transformer et de fusionner des tables de données.Cet add-in existe aussi pour Excel 2010 mais il me semble plus performant en 2013.
