Manual mode There's no need for a computer to control this pantograph: the arm fitted with a stylus moves in the groove of the model while the other arm fitted with a pin reproduces the composition. Thanks to the ingenious vibration-resistant depth regulating nose, this type of engraving remains even, regardless of the material being engraved.

Pantographs are devices designed for copying a plan or drawing on a different scale. In 1938, Norbert Schimmel invented the first pantograph under the brand name New Hermes, which would subsequently become the Gravograph Group in 1950.

Pantographs are simple and inventive solutions that make engraving accessible to a larger audience.
