CAUSE- Noise entering the controller through the "SmartPort" wiring or it is wired incorrectly.. SOLUTION - A few steps are necessary to determine cause of "Err" message.. 1. Check SmartPort ® Wiring. If the "Err" message is displayed without a device attached, check that SmartPort ® wiring is correct. Make sure that the SmartPort wiring is not bundled with the field wiring.

Pro-C - Err Messages | Hunter Industries

The balancer checks this flag to determine if it is to perform a calibration check or a balancing operation during the first spin after the balancer is turned on. If the flag is on, it does the calibration check. If the flag is off, it performs a balancing operation. The balancer also turns the flag off after a calibration check has been performed.

2 • Safety and Maintenance Information DSP9000-9500 Wheel Balancer Operation Instructions Electrical The DSP9000 and 9500 wheel balancers are manufactured to operate at a specific voltage and amperage rating. Make sure that the appropriate electrical supply circuit is of the same voltage and amperage ratings as marked on the balancer.

OPERATION INSTRUCTIONS DSP9000-9500 Wheel Balancer

Important: Some GM dealers may have a Hunter GSP9700 Road Force Balancer. This will simplify Step 5 by not requiring dial indicators. If a Hunter GSP9700 machine is available, it may also be used to measure the radial force of the tire/wheel assembly. A guideline here is 18 lbs or less. 4. While on the balancer, measure wheel runout.
