Zika Virus | CDC

There's a difference between infection and disease. Infection, often the first step, occurs when bacteria, viruses or other microbes that cause disease enter your body and begin to multiply. Disease occurs when the cells in your body are damaged — as a result of the infection — and signs and symptoms of an illness appear.

Germs: Protect against bacteria, viruses and infection

Meningitis (infection of the covering around the brain and spinal cord), intellectual disability, epiglottitis (life-threatening infection that can block the windpipe and lead to serious breathing problems), pneumonia (infection in the lungs), death Hepatitis A HepA vaccine protects against hepatitis A. Laughter decreases stress hormones and increases immune cells and infection-fighting antibodies, thus improving your resistance to disease. Laughter triggers the release of endorphins, the body's natural feel-good chemicals. Endorphins promote an overall sense of well-being and can even temporarily relieve pain. Laughter protects the heart.

Laughter is the Best Medicine - HelpGuide.org

The incubation period for rabies is typically 2-3 months but may vary from 1 week to 1 year, dependent upon factors such as the location of virus entry and viral load. Initial symptoms of rabies include a fever with pain and unusual or unexplained tingling, pricking, or burning sensation (paraesthesia) at the wound site.

Rabies - WHO | World Health Organization

A study that included 42 adults with mild cognitive impairment found that playing games on a brain-training app for eight hours over a four-week period improved performance in memory tests .

14 Natural Ways to Improve Your Memory

Drumming releases endorphins, enkephalins and Alpha waves in the brain, which are associated with general feelings of well-being and euphoria. Induces deep relaxation. In one study, blood samples from participants who participated in an hour-long drumming session revealed a reversal in stress hormones. Helps control chronic pain.
