Introduction To The Sas Macro

The SAS Macro Language The Macro Language is a second SAS programming language for string manipulation.

Characteristics of the language are: •

Online Library Introduction To The Sas Macro Language Lex

Jansen

strings are sequences of characters • all input to the macro language is a string • usually strings are SAS code, but they don't need to be • the macro processor manipulates strings and may send them

code, there is an extra step. Before SAS can compile and execute your program, SAS must pass your macro statements to the macro processor which then

Online Library Introduction To The Sas Macro Language Lex Jansen

“resolves” your macros generating standard SAS code. Because you are writing a program that writes a program, this is sometimes called meta-programming. **MACROS VS. MACRO VARIABLES**

243-29: SAS Macro Programming for Beginners

Online Library Introduction To The Sas Macro Language Lex Jansen

Macro variables are tools that enable you to dynamically modify the text in a SAS program through symbolic substitution. You can assign large or small amounts of text to macro variables, and after that, you can use that text by simply referencing the variable that contains it. Macro variable values have a maximum length of

Online Library Introduction To The Sas Macro Language Lex Jansen 65,534 characters.

Introduction to Macro Variables - SAS Support

The SAS macro language is a string based language. It does not support the use of hexadecimal character constants. Note: The SAS macro language does not support using hexadecimal values to
