Finding the Line of Best Fit Using a Graphing Utility. While eyeballing a line works reasonably well, there are statistical techniques for fitting a line to data that minimize the differences between the line and data values. [2] One such technique is called least squares regression and can be computed by many graphing calculators, spreadsheet software, statistical software, and many web-based ...

Looking again at the sine and cosine functions on a domain centered at the y-axis helps reveal symmetries.As we can see in Figure 6, the sine function is symmetric about the origin. Recall from The Other Trigonometric Functions that we determined from the unit circle that the sine function is an odd function because  $\sin(-x)=-\sin x$ .
