The basic principles of Scientific Management can be summarized as follows: Rule-of-thumb working methods should be replaced with methods based on a scientific study of the tasks. Individual workers should be selected, trained, and developed to complete specific tasks, rather than leave them to their own skills and passively training

Scientific Management English Edition
Scientific management has at its heart four core principles that also apply to organizations today.

They include the following: Look at each job or task scientifically to determine the “one best way” to perform the job. This is a change from the previous “rule of thumb” method where workers devised their own ways to do the job.
